

**Visualize the entire blade as shown in Figure 12 in the tutorial?[https://wenbinyugroup.github.io/ivabs/examples/example\\_uh60\\_sopt\\_stf.html](https://wenbinyugroup.github.io/ivabs/examples/example_uh60_sopt_stf.html)?**

I learned how to visualize a single blade cross-section in the tutorial, but how can I achieve the visualization of the entire blade as shown in Figure 12 in the tutorial?
