

Software on our servers

A brief summary to the most useful software installed in the server

1. Math software: Mathematica, Matlab
2. FEA software: Abaqus, ANSYS (shared-memory parallel computation is available)
3. Coding and Editing software: WinEdit (see [Link_WinEdt_MikTex.pdf](#) (85 KB) for details), Visual studio, Parallel studio, PilotEdit, Cygwin 64 Terminal, CodeBlocks

If you need to install some additional software codes on the Windows or Linux servers, please contact wenbinyu@purdue.edu.
